

## Immediate notification when flight status changes

Help travellers and employees better recover from travel disruptions

Extend day-of-travel services and provide better duty of care

Direct to customers or on your behalf

Verify insurance claims for delayed or cancelled flights immediately

## Flight status alerts to manage travel disruptions

- **Flight Notifications for Business (FNB)** delivers notifications to you via HTTP(S) for you to redistribute or send directly to your users via email
- Ensure efficiency and best-in-class customer service
- Flexibility – receive notifications via HTTP(S) and use them internally or send to your clients, or have OAG send email alerts or SMS alerts to your clients on your behalf
- “Bulk” register flights and receive notifications of changes to your clients’ flights
- Multilingual capabilities – service is available in any language of choice to reach global users

Today 9:54 AM
