

Worldwide Direct Flights (WDF) files in a format of your choice

Receive global flight schedules in a flexible format for easy integration

View, manipulate and analyse bulk schedule files with ease

Ensure operational, booking and planning systems are up to date for greatest efficiency

Deliver a high-quality service for greater customer service and loyalty

Key features:

- Point-to-point passenger and cargo schedules data
- Variety of formats for easy access, integration and usability (Excel, CSV and plain text)
- Flexible content parameters organised in alphabetic departure and arrival order
- Coverage can include all carriers or any subset
- Fields and codes can be added or removed
- Files delivered daily or a frequency of your choice
- File replacements or daily changes can be supplied

*We have been using OAG in our Concierge ground transportation booking and dispatch system for 10 years. We have always found a high degree of accuracy in the data and have been complimented by our customers on its ease of use. The data is always delivered on time and we have never experienced any problems with loading it into our system.*

John Bankes, IT Director, Dial-a-Cab
